

DB500

Thermal binder

Professional results come automatically

Professional results come automatically

Does your company print and distribute large quantities of in-house publications to clients and other interested parties? Then making a consistent and professional impression is all the more important. The DB500 makes light work of it. Thanks to highly advanced automatic functions, you can bind up to 1,600 documents per hour, or 100 documents in less than six minutes. The result? You would be forgiven for thinking that they had come straight from a professional print shop

Quick, easy, and effective

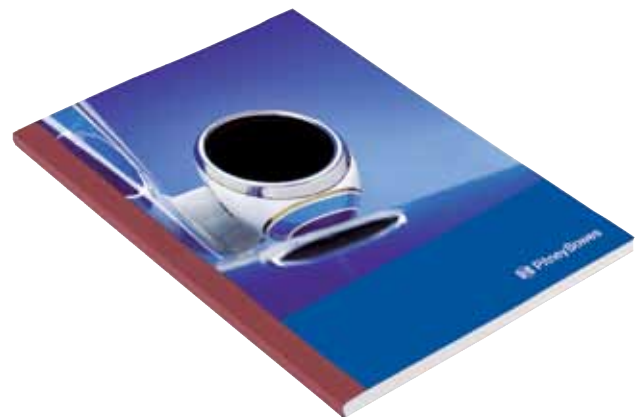

The automatic features of the DB500 are not just convenient, they are something you can rely on – every time. For example, paper jogging, heating and cooling processes are all handled automatically. When you are in a hurry, it is nice to be able to flick through a document straight after binding, without having to wait for the cooling period needed with manually operated binders.

Technical specification DB500

Document format	A4
Spine widths	1.5mm – 15mm
Capacity	400 - 1,600 documents per hour, dependent on spine width
Power supply	230V, 50/60Hz, 140W (maximum)
Dimensions	475 x 511 x 360mm
Weight	28 kg

Creating a professional impression is easy

- 1
Place the set of paper in the automatic cover size selector.
 - ↓
 - 2
The display will indicate a suitable spine width.
 - ↓
 - 3
Put the set of paper in your chosen DB500 cover.
 - ↓
 - 4
Place one or several documents in the document binder as soon as the green light goes on.
 - ↓
 - 5
Remove the ready-bound document from the tray.
- Congratulations – you have produced a professionally bound document in an instant!
